# Movento® MPC Insecticide/Nematicide

## Group 23 Insecticide - Citrus

Movento® MPC insecticide/nematicide provides all over protection to maximize fruit quality and long-term tree health. The two-way systemic movement protects the entire plant from leaf to leaf and leaf to root, including those in dense crop canopies, new shoots and root systems.

Additionally, Movento MPC provides residual control of Asian citrus psyllids (ACP) and rust mites and also protects against damage from root weevils, mealybugs, scale and nematodes.

### /// BENEFITS

- **Broad Pest Protection**  
Protects against several critical pests such as ACP, rust mites and root weevils.
- **Foliar Application**  
Controls pests on fruit as well as old and new growth throughout the canopy for all over protection with foliar application.
- **Resistance**  
A unique mode of action for effective and sustainable insect resistance management.
- **Integrated Pest Management (IPM) Fit**  
With minimal risk to natural predators and beneficial insects, it makes an ideal addition to IPM programs when used as directed.

### /// APPLICATION TIMING AND METHOD

Application during periods of active plant growth is optimal for uptake and translocation. Two applications of Movento® MPC insecticide/Nematicide should be applied between pre-bloom and early fruit development.

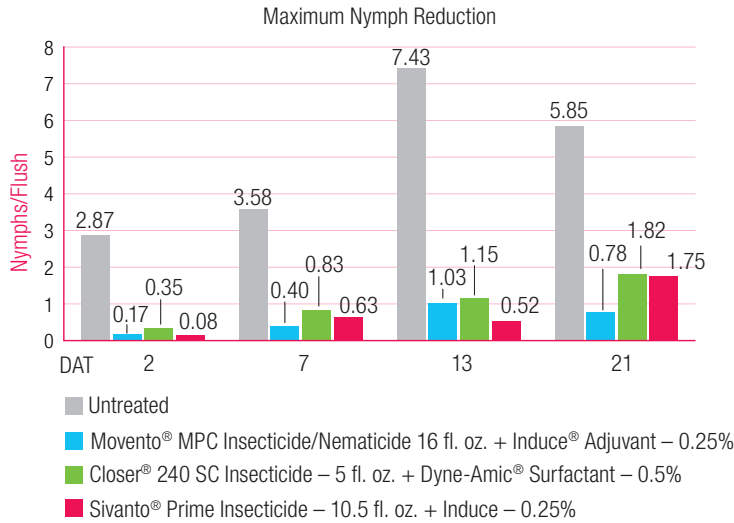

- Application should be made to every row and both sides of the trees within 72 hours.
- Avoid excessive runoff. Carrier volume in excess of 350 gal./A should be avoided.
- Apply when foliage is dry. Movento MPC is rainfast in four hours.
- Do not apply within 10 days prior to bloom, during bloom, or until petal fall is complete.

### /// MOVENTO® MPC INSECTICIDE/ NEMATICIDE QUICK FACTS

- **Active Ingredient:** Spirotetramat
- **IRAC:** Group 23 Insecticide
- **Signal Word:** Caution
- **REI:** 24 hours
- **PHI:** 1 day
- **Use Rate:** 16 fl. oz./A
