

# Provost® Silver Fungicide

## *Powers Up Peanut Disease Control*

Peanut growers who include Provost® Silver fungicide in their disease management prescription protect their crop from a broad spectrum of soilborne and foliar diseases and open the door to higher yield opportunities. With its differentiated mode of action, Provost Silver is an essential component of any peanut spray program. Growers who use Provost Silver in their application rotation preserve the longevity of disease management tools needed for future seasons.

### /// PROVOST® SILVER FUNGICIDE ADVANTAGES

- **Highest Efficacy**  
Most efficacious DMI on the market.
- **Powerful Tool**  
At the high use rate, Provost Silver delivers nearly 80 percent more prothioconazole than Provost® Opti fungicide.
- **Systemic Activity**  
Provost Silver moves in both directions: downward on the stem to control soil diseases and upward to new growth.
- **Broad-Spectrum Control**  
Provost Silver delivers proven performance against soilborne and foliar diseases, including early leaf spot, late leaf spot and white mold.
- **Resistance Management**  
Provost Silver is the tool growers need to control disease today and manage resistance for tomorrow.
- **Flexible Application**  
Provost Silver is highly compatible with a wide variety of tankmix partners, including insecticide, fungicide, herbicide and fertilizer products.

- **Rotational Advantages**

As a DMI-based formulation (FRAC Group 3) Provost Silver is the perfect rotational partner in any current commercially recommended program, especially for SDHIs (FRAC Group 7).

### /// GROWERS IMPRESSED BY PROVOST® SILVER FUNGICIDE

Lanier Raulerson and his son, Daniel Raulerson, of Douglas, Georgia, plan to include Provost Silver applications in their peanut disease management program. The Raulersons plan to start with Velum® Total nematicide/fungicide, then rotate Provost Silver, a FRAC Group 3, with other modes of action to manage resistance.

“We had heavy white mold pressure in 2018, and Provost Silver controlled it,” Daniel said, noting that plant health was high.

“I was impressed with Provost Silver. We saw little to no disease,” Lanier said. “I don’t usually make big changes with a new product. We’re putting Provost Silver on all our peanuts this year\*.”
