

Ditch the Status Quo when it Comes to Weed Control

DiFlexx® herbicide is an outstanding combination of dicamba and a highly effective CSI™ Safener.

/// BENEFITS

- **Only Dicamba with Both Root and Foliar Safeners**
This means it is safer than generic dicamba and results in significantly less crop injury.
- **Can be Applied Anytime from Burndown to V10**
The root safener allows for little timing restrictions which means more a flexible application window compared to Status® herbicide..
- For all applications of this product, we strongly recommend the inclusion of a Drift Reduction Agent product in the tank mix.
- **Liquid Formulation**
Allows for easier and faster mixing compared to Status® herbicide.

Registered Crops

- Field Corn (Gran & Silage)

Key Pests

- | | |
