

LEVERAGE® 360

Leverage® 360 Insecticide

Group 3 / 4A Insecticide

Leverage® 360 insecticide has two modes of action against sucking and chewing pests – one delivers fast knockdown, and the other extends residual control. Leverage 360 with Stress Shield™ protection helps plants stay vigorous for greater yield potential.

/// LEVERAGE 360 QUICK FACTS

- Active Ingredient: Imidacloprid and Beta-Cyfluthrin
- Restricted Use: Yes
- Signal Word: Warning
- REI: 12 hours
- PHI: 0–28 days, depending on crop
- Use Rate: Varies by crop and pest

/// BENEFITS

- **Two Modes of Action**
Offers both contact and systemic activity for rapid knockdown and residual protection.
- **Powerful Control**
Protects labeled crops from sucking and chewing pests.
- **Stress Shield Protection**
Enhances each crop's ability to handle a variety of biotic and abiotic stresses, thereby maximizing yield potential.

/// FEATURING STRESS SHIELD™ TECHNOLOGY

Growers who use Leverage® 360 enjoy full-circle protection through the insecticide's innovative Stress Shield™ technology. This feature safeguards plants from many environmental stresses that can reduce plant vigor and yield.

Stress Shield helps growers defend against two types of environmental stress – biotic and abiotic. Biotic stresses include insect and microorganism feeding. Abiotic stresses include drought, temperature extremes, oxygen deficiency, high soil salinity, waterlogged soils and more.

While maximizing yield potential, Stress Shield interacts with the plant to:

- Reduce its energy requirements.
- Promote cell growth and restoration.
- Promote root growth in water-saturated soils.
- Stimulate natural defenses against fungal infection.
- Induce growth of leaves and flowers.
- Promote photosynthesis.

Registered Crops	Key Pests
• Citrus • Cotton • Grapes • Potatoes • Soybeans • Brassica and leafy vegetables • Fruiting vegetables • And many more	• Aphids • Bollworms • Colorado potato beetles • Leafhoppers • Stink bugs
