

MINUET™

Minuet™ Biological Fungicide

Fungicide Group BM02 – Corn

Minuet™ fungicide is a soil-applied biological crop protection product. In the soil, it forms a symbiosis with the plant and triggers activation of root and plant growth as well as the plant's defense response to support healthy plants and increased crop quality and yield potential.

/// BENEFITS

- Designed for soil application
- Low use rate
- Supports early plant establishment crop vigor*
- Suppresses key diseases such as Fusarium, Phytophthora, Pythium, Rhizoctonia and Verticillium
- Supports crop quality improvements and yield potential

/// PROVEN PERFORMANCE

- **Stress Reduction**

Minuet™ helps plants tolerate stress tolerance like drought and heat.

/// QUICK FACTS

- **Active Ingredient:** Bacillus subtilis strain QST 713
- **Signal Word:** Caution
- **REI:** 4 hours
- **PHI:** 0 days
- **Use Rate:** 3 to 6 fl.oz./A

/// HOW MINUET™ BIOLOGICAL FUNGICIDE WORKS

When applied to the root zone, Minuet colonizes the roots and helps enhance root growth. This helps increase nutrients bound in the soil, priming the plant against biotic and abiotic stress and protecting against disease.

Target Diseases	
• <i>Fusarium</i> **	• <i>Rhizoctonia</i> **
• <i>Phytophthora</i> **	• <i>Verticillium</i>
• <i>Pythium</i>	
** Disease Suppression	

*Comparing Minuet™ Fungicide to 85% of the entire target market.

IMPORTANT: This bulletin is not intended to provide adequate information for use of these products. Read the label before using these products. Observe all label directions and precautions while using these

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Performance may vary, from location to location and from year to year, as local growing, soil and environmental conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on their growing environment. The recommendations in this material are based upon trial observations and feedback received from a limited number of growers and growing environments. These recommendations should be considered as one reference point and should not be substituted for the professional opinion of agronomists, entomologists or other relevant experts evaluating specific conditions.
