**RESISTANCE MANAGEMENT:**

For resistance management, **Profler** is a group code 43 and 33 fungicide. Any fungus population may contain individuals naturally resistant to **Profler** and other group code 43 and 33 fungicides. The resistant individuals can eventually dominate the fungus population if these fungicides are used repeatedly. These resistant fungi may not be controlled by **Profler** or any other group code 43 and 33 fungicides.

To delay fungicide resistance:

- Avoid exclusive repeated use of fungicides from the same fungicide group code. Do not apply **Profler** more than **FOUR** times per season. Alternate with products from different fungicide group codes.
- Integrate other control methods (chemical, cultural, biological) into disease control programs.

**For specific information on resistance management contact the registration holder of this product.**

**DIRECTIONS FOR USE:** USE ONLY AS DIRECTED.

**WEERSTANDSBESTUUR:**

Vir weerstandsbestuur is **Profler** 'n groepcode 43 en 33 swamdoder. Enige populasie van 'n spesifieke swam mag individue insluit wat 'n natuurlike weerstand teen **Profler** en ander groepcode 43 en 33 swamdoders het. Indien hierdie swamdoders herhaaldelik aangewend word kan die weerstandbiedende individue uiteindeelik die swampopulasie oorheers. Hierdie weerstandbiedende swamme sal waarskynlik nie deur **Profler** of enige ander groepcode 43 en 33 swamdoder beheer word nie.

Om weerstand teen swamdoders te vertraag:

- Vermey die eksklusiewe herhaaldelike gebruik van swamdoders in dieselfde swamdoder groepcode. Moet nie meer as **VIËR Profler** bespuitings per seisoen toedien nie. Wissel af met produkte in verskillende swamdoder groepcodes.
- Integreer ander beheermaatreëls (chemies, verbouing, biologies) in siekte beheer programme.
