

Powerful Weed Control with Three Sites of Action

TripleFLEX® II herbicide is a premix of acetochlor, flumetsulam and clopyralid. This product contains three modes of action for control of weeds resistant to ALS, glyphosate or triazine. It provides broadspectrum control of key grass and small and large seeded broadleaf weeds without atrazine. With a flexible application window, TripleFLEX II can be applied preplant, preemergence and postemergence in corn up to 11 inches.

/// BENEFITS

- Resistance Management**
 TripleFLEX II herbicide contains three sites of action for control of ALS, glyphosate or triazine resistant weeds
- Application Flexibility**
 Flexible application window: preplant, preemergence and early postemergence, up to 11-inch corn
- Broad Spectrum Weed Control**
 Provides broad-spectrum control of key annual grasses and small and large seeded broadleaf weeds without atrazine
- Excellent Crop Safety**
 TripleFLEX II herbicide delivers crop safety that growers rely on with the same proven safener found in Harness® brand herbicides and Degree Xtra® herbicide
