

TriVolt® Herbicide for Visibly Clean Fields

Built with a proprietary formula, TriVolt® herbicide, a restricted use pesticide, delivers consistently high weed control for visibly clean fields.

/// PRODUCT BENEFITS

- Keeps fields clean for up to eight weeks in a variety of weather conditions.
- Controls a broad spectrum of key grass and broadleaf weeds.
- Built-in resistance management tool with a proprietary combination of three different sites of action (Groups 2, 15 and 27). When tankmixed with atrazine, TriVolt® delivers four sites of action.

/// PRODUCT FEATURES

- TriVolt® contains three different active ingredients: flufenacet, isoxaflutole and thienencarbazone.
- Flexible application window from preplant burn down, preemergence and after corn emergence through the two-leaf collar growth stage (V2).

Registered Crops

- Corn

Key Weeds

- | | |
|------------------------|-------------------|
| • Barnyardgrass | • Fall Panicum |
| • Common Lambsquarters | • Foxtail Species |
| • Common Ragweed | • Kochia |
| • Common Waterhemp | • Palmer Amaranth |
| • Crabgrass Species | • Velvetleaf |

Formulation Information	Flufenacet (2.85 lb. A.I./gal) Isoxaflutole (0.57 lb. A.I./gal) Thiencarbazone-methyl (0.23 lb. A.I./gal) Cyprosulfamide, a safener
Site-of-Action Groups	  
Recommended Application Rate*	Two-Pass Herbicide Program: 12 fl oz/A One-Pass Herbicide Program: 20 fl oz/A
Application Timing	Preplant, Preemergence/At Planting, Early Postemergence (through V2 corn)
Recommended Tankmix Options	 Atrazine  DiFlexx® herbicide
*Coarse soils 2% O.M. or less have lower application rates; please confirm usage with label.

IMPORTANT: This bulletin is not intended to provide adequate information for use of these products. Read the label before using these products. Observe all label directions and precautions while using these products.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Performance may vary, from location to location and from year to year, as local growing, soil and environmental conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on their growing environment. The recommendations in this material are based upon trial observations and feedback received from a limited number of growers and growing environments. These recommendations should be considered as one reference point and should not be substituted for the professional opinion of agronomists, entomologists or other relevant experts evaluating specific conditions. TriVolt® is a restricted use pesticide. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Check with your state department(s) of agriculture, local dealer or representative for the product registration status in your state. Not all products are registered for use in all states and may be subject to use restrictions. Bayer, Bayer Cross, DiFlexx® and TriVolt® are trademarks of Bayer Group.
