

## Crop Safety with Patented Micro-encapsulation Technology

Warrant® herbicide is an acetochlor-based preemergence and postemergence residual herbicide. The micro-encapsulated technology in Warrant herbicide helps provide improved crop safety and residual weed control for up to 30 days after application. The product provides preemergence, residual control of grass and small-seeded broadleaf weeds. The product will not control emerged weeds and must be applied to a weed-free soil surface or in a tank-mixture with products that provide postemergence control of weeds at the time of application.

### /// BENEFITS

- **Wide Range of Crop Uses**  
Acetochlor-based residual herbicide for control of small seeded broadleaf weeds and grasses in multiple crops
- **Good Crop Safety Potential**  
Bayer's unique microencapsulation technology provides improved crop safety potential with pre-emergence and postemergence applications
- **Excellent Tank-Mix Partner**  
Excellent tank-mix partner with Roundup® brand agricultural herbicides
- **Application Flexibility**  
Flexible application window across wide range of crops
- **Outstanding Systems Fit**  
Ideal product for a layered residual strategy

### Registered Crops

- |                        |                           |
|------------------------|---------------------------|
| • Field Corn           | • Forage or Grain Sorghum |
| • Production Seed Corn | • Soybeans                |
| • Popcorn              | • Sugarbeets              |
| • Cotton               | • Alfalfa                 |
|                        | • Peanuts                 |

### Key Pests

- |                   |                        |
|-------------------|------------------------|
| • Pigweed species | • Fall Panicum         |
| • Foxtail Species | • Crabgrass            |
| • Barnyardgrass   | • Common Lambsquarters |

### Formulation Information

- |                             |                      |
|-----------------------------|----------------------|
| • Acetochlor (3 lbs ai/gal) | • Capsule Suspension |
|-----------------------------|----------------------|

Crop	Application Rate	Application Timing	Site-of-Action Group*	Recommended Tankmix Options
Corn	1.5 to 3 qts/A	Preplant, Preemergence,* Postemergence (up to 30" corn)	15	Atrazine 5 DiFlexx® herbicide 4 DiFlexx® DUO herbicide 4 27 Capreno® herbicide 2 27 Corvus® herbicide 2 27 Balance® Flexx herbicide 27 Laudis® herbicide 27 Roundup PowerMAX® 3 herbicide 9
Cotton	1.25 to 2 qts/A	Preplant, Preemergence, Postemergence (after full emergence and before first bloom cotton)	15	Roundup PowerMAX® 3 herbicide 9
Soybeans	1.25 to 2 qts/A	Preplant, Preemergence, Postemergence (before R2 soybean)	15	Roundup PowerMAX® 3 herbicide 9

\*Preplant, Preemergence in certain states only; read and follow the herbicide label

Crop	Application Rate	Application Timing	Site-of-Action Group*	Recommended Tankmix Options
Peanuts	1.25 to 2 qts/A	Preplant, Preemergence, Postemergence (through R1 peanut)	15	
Forage or Grain Sorghum	1.5 to 3 qts/A	Preplant, Preemergence, Postemergence (up to 11" grain sorghum)	15	
	1.25 to 2 qts/A	Postemergence (2 leaf up to 8 leaf growth stage)	15	Roundup PowerMAX® 3 herbicide 9
Alfalfa	1.25 to 2 qts/A	<p><b>New Stand Establishment (Seeding Year)</b> Fall Planted: up to or at the 4th trifoliate stage following emergence or greenup or regrowth in the spring</p> <p>Spring Planted: up to or at the 4th trifoliate stage following emergence of the new stand</p> <p><b>Established Alfalfa Stand (Non Seeding Year)</b> Postemergence (in crop) after spring greenup in established stands</p>	15	Roundup PowerMAX® 3 herbicide 9
