

Provost® Silver Fungicide

Powers Up Peanut Disease Control

Peanut growers who include Provost® Silver fungicide in their disease management prescription, protect their crop from a broad spectrum of soilborne and foliar diseases, opening the door to higher yield opportunities. With its differentiated mode of action, Provost® Silver is an essential component of any peanut spray program.

/// BENEFITS

- **Highest Efficacy**
Most efficacious DMI on the market.
- **Powerful Tool**
At the high use rate, Provost® Silver delivers nearly 80 percent more prothioconazole than Provost® Opti fungicide.
- **Systemic Activity**
Provost Silver moves in both directions: downward on the stem to control soil diseases and upward to new growth.
- **Broad-Spectrum Control**
Provost® Silver delivers proven performance against soilborne and foliar diseases, including early leaf spot, late leaf spot and white mold.
- **Resistance Management & Rotational Advantages**
As a DMI-based formulation (FRAC Group 3) Provost Silver is the perfect rotational partner in any current commercially recommended program, especially for SDHIs (FRAC Group 7).
- **Flexible Application**
Provost® Silver is highly compatible with a wide variety of tankmix partners, including insecticide, fungicide, herbicide and fertilizer products.

/// GROWERS IMPRESSED BY PROVOST® SILVER FUNGICIDE

Lanier Raulerson and his son, Daniel Raulerson, of Douglas, Georgia, plan to include Provost® Silver applications in their peanut disease management program. The Raulersons plan to start with Velum® Total nematicide/fungicide, then rotate Provost® Silver, a FRAC Group 3, with other modes of action to manage resistance.

"We had heavy white mold pressure in 2018, and Provost® Silver controlled it," Daniel said, noting that plant health was high.

"I was impressed with Provost® Silver. We saw little to no disease," Lanier said. "I don't usually make big changes with a new product. We're putting Provost® Silver on all our peanuts this year*."

/// PROVOST® SILVER FUNGICIDE SLAYS LEAF SPOT

Win the battle against early and late leaf spot with the systemic activity provided by Provost® Silver fungicide.

Tackle Leaf Spot with the Help of Provost® Silver

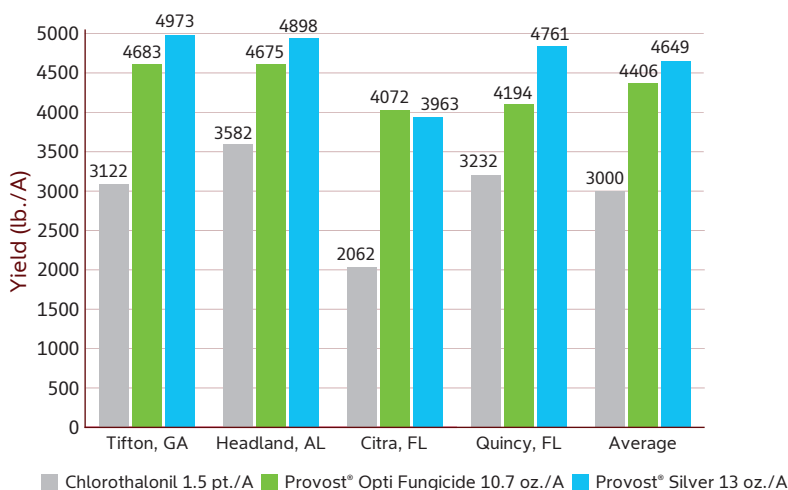

University of Georgia, Tifton, 2018; Auburn University, Headland, 2018; University of Florida, Citra, 2018; University of Florida, Quincy, 2018.

/// PICK MORE PEANUTS WITH PROVOST® SILVER

University trials across the Southeast show Provost® Silver consistently delivers higher yields than the standard chlorothalonil treatment.

Adding Provost® Silver to a Peanut Application Rotation Contributed to Higher Average Yields

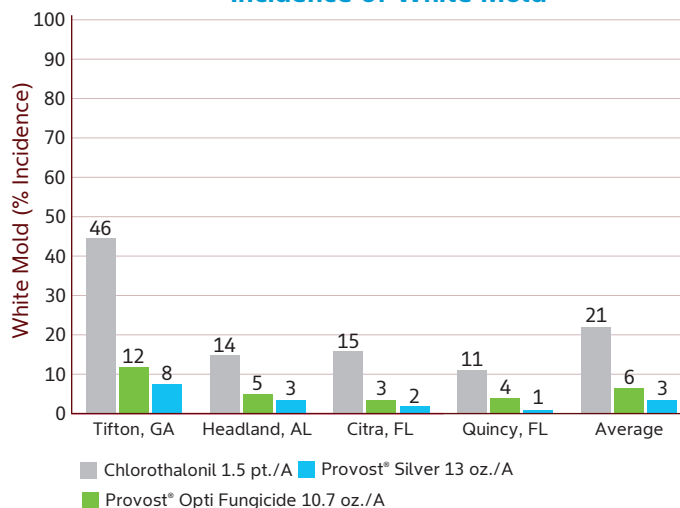

University of Georgia, Tifton, 2018; Auburn University, Headland, 2018; University of Florida, Citra, 2018; University of Florida, Quincy, 2018.

/// PROVOST® SILVER PROVIDES CONTROL OF WHITE MOLD

Growers accustomed to the consistent control Provost® Opti provided will also see the difference Provost® Silver makes in combating white mold.

Provost® Silver Helps Control Incidence of White Mold

University of Georgia, Tifton, 2018; Auburn University, Headland, 2018; University of Florida, Citra, 2018; University of Florida, Quincy, 2018.
